

In The Specification

Please replace the paragraph starting on page 9, line 15, with the following paragraph:

5 **Figure 4** illustrates the operational flow of the relevant aspects of NB always visible display application **212** of the present invention, when responding to a request to render a NB always visible display, in accordance with one embodiment. As illustrated, in response to a call (e.g. by another application) to render such display, e.g. NB always visible window **104**, on-line data monitor **106**, tool bar **124**,
10 animated assistant **134**, and logo/mark **144**, NB always visible application **212** determines the physical location of the display screen area, on which the NB always visible display is to be displayed, block 402. The determination is typically made by mapping the logical location information provided with the function call to the actual physical location. Alternatively, such as the contemplated logo/mark application, the
15 location may be defaulted to an initial area.
